

Maryam Asha

Software Engineer — Full Stack Developer (Laravel, Vue.js)

Aleppo, Syria | ashamaryam84@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Developer with 3+ years of experience building scalable web applications using Laravel and Vue.js. Specialized in backend development, API design, and performance optimization. Experienced in building production-grade systems including government platforms, ERP systems, and e-commerce applications, with a focus on clean architecture, reliability, and system efficiency.

Core Technical Expertise

Backend: Laravel, REST APIs, Modular Architecture, RBAC, API Security

Frontend: Vue.js, Vuex, Vuetify, Tailwind CSS

Database & Caching: MySQL, Redis, Firebase

Performance Engineering: Laravel Octane, Query Optimization, JMeter, System Profiling

Realtime Systems: Laravel Reverb, WebSockets, Notifications, Chat Systems

Tools: Git, Postman, Agile Workflow

Professional Experience

Full Stack Developer — Automata4 Group

2023 – Present

Wajab – Government Complaint Management Platform

- Designed and implemented modular backend architecture for multi-level governmental workflows.
- Improved API performance using Redis caching and Laravel Octane, reducing response time to under 1 second.
- Conducted load testing using Apache JMeter simulating 500 concurrent users.
- Optimized database queries and request lifecycle for higher throughput and stability.

Katateeb – School ERP Platform

- Built API-driven backend services for students, teachers, and administrators.
- Implemented real-time communication system using Laravel Reverb for chat and notifications.
- Developed scalable dashboard architecture for dynamic data visualization.

Full Stack Developer — Comma

2025 – Present

ZOKA – E-Commerce Platform

- Built backend infrastructure for product, order, and transaction management.
- Designed secure REST APIs for frontend and admin dashboard integration.
- Implemented order lifecycle management with business validation rules.
- Ensured data consistency across distributed workflows.

Leadership & Entrepreneurship

Co-Founder & Lead Developer — Wasla Startup

May 2025 – Oct 2025

- Led MVP development from concept to production system.
- Defined system architecture and technical direction.
- Conducted product validation and iterative development cycles.

Education

M.B.A

Syrian Virtual University

2025 – Present
